PROCESS of making product :

The Individual Quick Frozen (IQF) process :

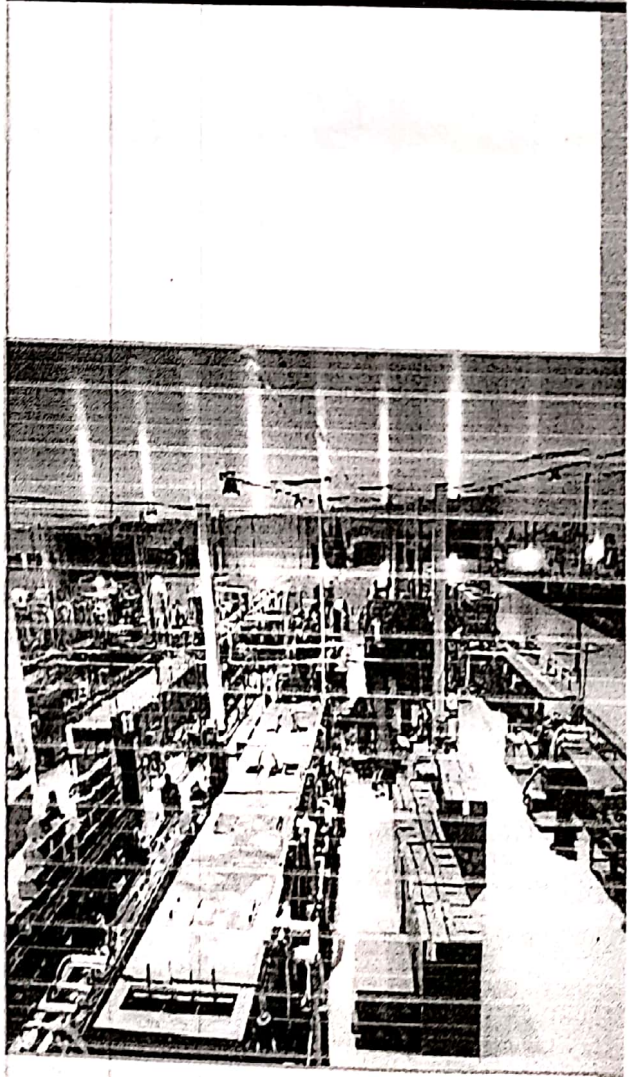

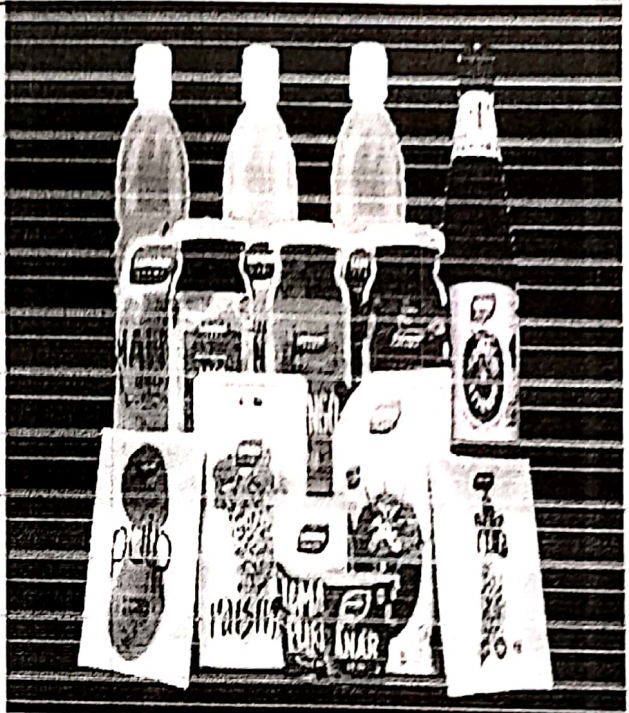

all the natural parameters of the Fruits & Vegetables can be preserved. The most important feature of this process is the ultra-rapid freezing to a very low temperature (-30 degree C to -40 Degree C),

Traditional Fruit Processing Methods :

Heat treatment Fermentation
Pickling Smoking Drying Curing
Modern Fruit.

Manufacturers are :

Fermentation : During fermentation, sugars are broken down with the use of bacteria, yeasts or other microorganisms. It is practiced under anaerobic conditions, i.e. no oxygen is needed for the process. Fermentation is primarily used for the production of alcoholic.

beverages such as wine , beer in the preservation of Modified atmosphere.

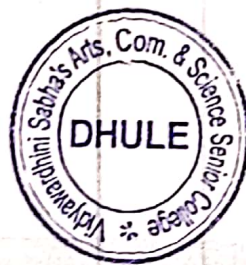

packaging : Fruit Juice Processing Plants substitute the air within the package by a protective gas mix that includes oxygen, carbon dioxide and nitrogen. These gases are beneficial when it comes to extending the shelf life of fresh fruits, vegetables.

Pasteurization:

In this process, food is heated and cooled down quickly to kill the pathogens. Apart from dairy products , Pasteurization is used for safe preservation of canned foods, juices and alcoholic beverages.

Food additives are added to ensure food safety or to maintain shelf -life of processed fruits. For ex, antioxidants prevent fats and oils from becoming rancid; preservatives prevent the growth of microbes.

Overview of Fruit Processing in India :

India is known as the fruit basket, it contributes industry. only 1% of the global market fruit processing The wastage of fresh fruits is estimated of around 30-35% of the total production during harvest, storage, Grading, transport, packaging and distribution due to unskilled workforce, inadequate cold storage facilities, inefficient, post-harvest, management, minimal technological interventions. Fruit and Vegetable Processing Machinery Manufacturers believe that with specialized food processing equipment, cold storage facilities, logistics infrastructure, skilled human resources and modern technological interventions, major stakeholder's like farmers and the end consumer

DESCRIPTION OF THE VARIOUS CHEMICAL, TECHNICAL PROCESS

Raw water from wells and borwells

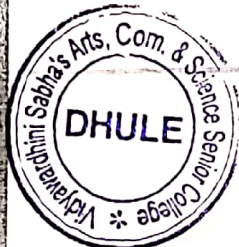

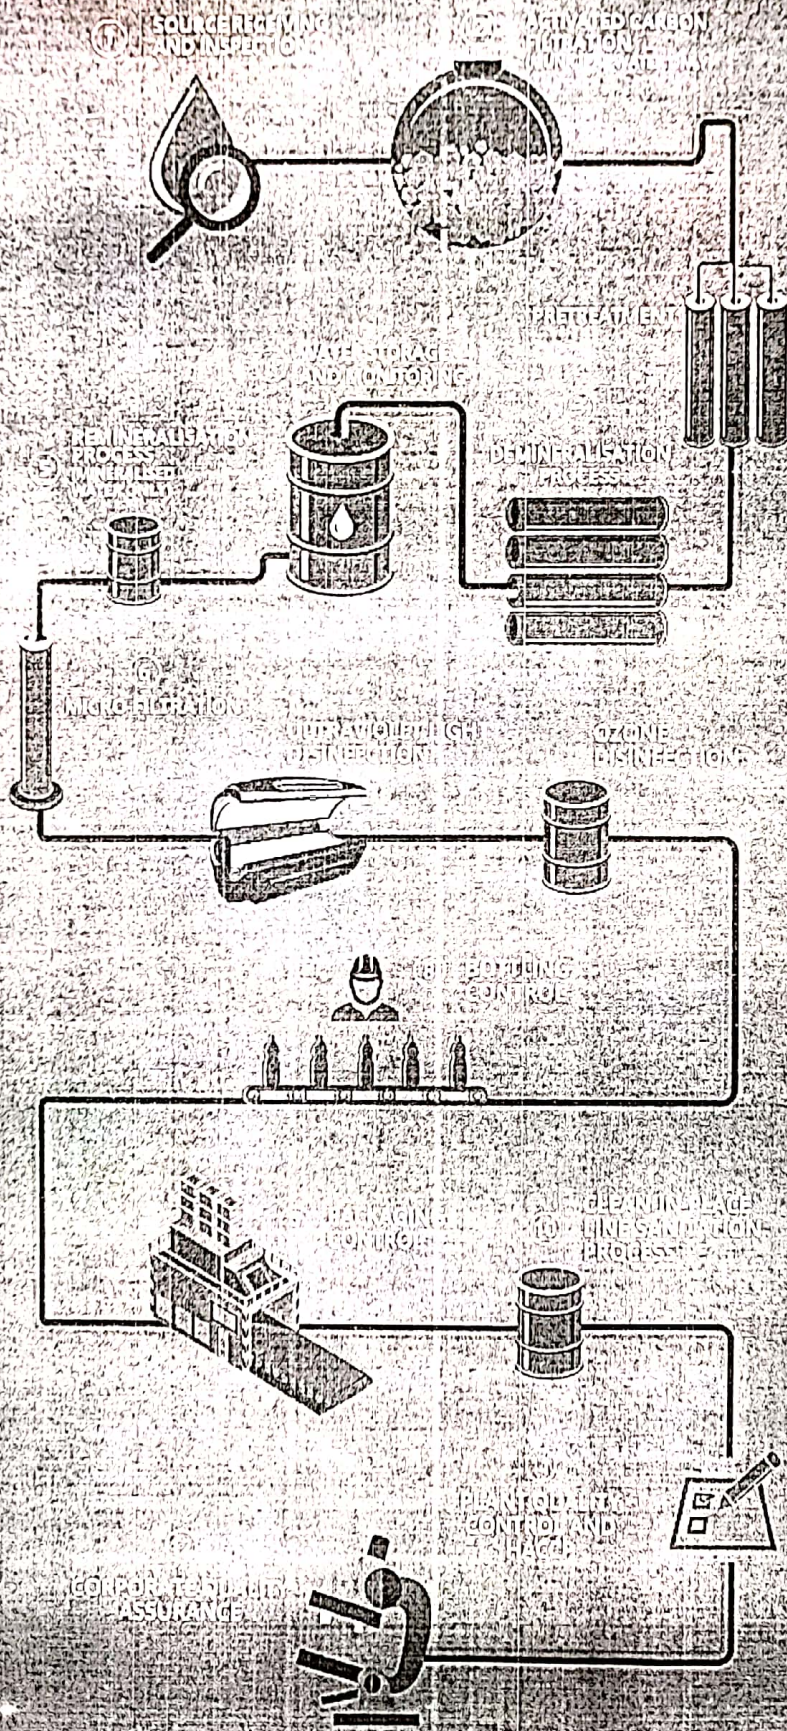

FINAL AND BY PRODUCT

Main Product :- Purified Water

By Product : Waste Water

THE 12 STEPS OF THE QUALITY PROCESS

The process aims to guarantee the highest safety standards for drinking water and ensure a taste that is in accordance with consumer preference.

1. Water is carefully collected and received through stainless steel pipes from either a local well or municipal water supply. Quality testing of the original source is conducted regularly to monitor for abnormalities.
2. This step is taken when the water originates from a municipal or public drinking water system. It consists of removing chlorines and THMs (trihalomethanes) through a daily-monitored activated carbon filtration process.
3. A water softener is used to reduce water hardness.
4. Demineralisation removes unwanted minerals (through reverse osmosis or distillation).
5. Water received in storage tanks is monitored on a daily basis.
6. Selected minerals are added to cater to consumer taste preferences.
7. Pharmaceutical grade micro-filtration removes particles as small as 0.2 microns. It is also capable of removing potential microbiological contaminants. This is monitored on an hourly basis.
8. Ultra-violet filtration provides additional product disinfection. This is monitored on an hourly basis.
9. Ozone disinfection is the third disinfection step (steps 7-9), using a highly reactive form of oxygen. This is monitored on an hourly basis.
10. The filling room is highly sanitary to ensure bottling is conducted in a microbiologically controlled environment. It is continuously monitored and controlled.
11. Packaging quality assurance is conducted by human inspection and the latest in modern equipment designed to ensure the removal of any packaging defects.
12. Line sanitation includes automated cleaning equipment to ensure maximum cleanliness, effectiveness and control.

QUALITY CONTROL :-
